

BBC Chartering & Logistic is one of the world leading companies in transportation of Non-Containerized Goods, headquartered in Leer, Germany. We operate a diverse fleet of more than 110 modern, multipurpose vessels with lifting capacities up to 500 mts. The shallow draft characteristics of each ship enable us to serve almost any port and offshore operation and we are perfectly geared for every break bulk, heavy lift, project and bulk cargo requirements. With 24 Offices in countries all over the world, we have the ability to deploy local experts anywhere on the globe!

For our Headquarters in Leer, Germany we are searching for a (f/m)

Naval Architect

Your main tasks are:

Design and analysis of ship structures including:

- Scantling calculations to Classification Society Rules
- Longitudinal strength analysis
- Global finite element analysis
- Hull girder stress and deflection analysis
- Shear flow analysis
- Analysis of lifting, turning and transport arrangements and preparation of turning and transport procedures, for units and blocks of ship structure
- Stability and Seakeeping analysis/assessment

As Naval Architect / Structural Engineer we expect you to have experience in the design and analysis of marine structure. You have good communication, interpersonal and intercultural skills. Knowledge of Project Cargo / Heavy Lift Cargo would be perfect.

Your key qualifications:

- Minimum Requirement - Degree Qualified in Naval Architecture or similar
- Ideally Chartered Engineer registered with Engineering Council and Relevant Institute is desirable

Besides your knowledge of stability calculation and structure analysis you will need the whole variety of your professional training and university education in Naval Architecture.

If you like to work in a highly motivated team with pleasant working conditions in an open atmosphere and you fulfill the above exigencies, please send your application indicating your earliest date of entry and salary requirements to the following address:
