Speed figures are calculated basis maximum Beaufort 2, no swell and no adverse currents. Intake is always subject to vessel's stability, trim, permissible weights and is subject to regulations of visibility. Lifting capacity of vessel's cranes is subject to vessel's stability and can depend on cargo/ballast on board. Container data as well as cargo hold capacity assumes tweendeck ashore. All details including speed are given in good faith and can vary on the individual vessels. They are to be considered „about“, are given without guarantee and must not be used as basis for charterparties or contracts without BBC Chartering's explicit written authority.
